

TITLE OF INVENTION

TERMINAL ELECTRODE COMPOSITIONS FOR MULTILAYER
CERAMIC CAPACITORS

5

ABSTRACT

The present invention relates to terminal electrode compositions for
multilayer ceramic capacitors. More specifically, it relates to terminal
electrode compositions for multilayer ceramic capacitors which have a
metal oxide component selected from SnO_2 , V_2O_5 and MoO_3 . The
10 compositions can be fired at a low temperature in a nitrogen atmosphere.
